1.Control:

2.Some tricks
The yellow enemy called peepy in sleepyhollow might be too hard for your first fight...so fight against Ricki, the green guy. He is very easy to defeat. Increase your Level by fighting against Ricki and go on whenever you want.
Choose splitti, because he's got more attackpower than peekhatshoe or icecube.

3.Savegame Editing:
Thats very easy...but you want to play without cheating, right?

Have Fun!
